

Fi-Tek, LLC (Parent Company of Rokit Solutions, LLC) is a financial technology company that provides products, infrastructure, and services to wealth management institutions – including Private Banks, Trust Banks, Wealth Managers, RIAs, Hedge Fund Managers & Administrators, and Family Offices. We have about 450 clients, ranging in size from \$200 million to \$80 billion, with a combined Assets Under Servicing of over \$1.3 trillion. Our company is over 350 people strong and consists of business analysts, software designers & engineers, product managers, and accountants – bringing together a diverse skillset to deliver a unique solution to our clients. . Our company culture is one that Fi-Tek prides itself on, as we continue to uphold an atmosphere that encourages professional development, a team oriented environment and an excellent work-life balance.

Fi-Tek is looking for an eager & strong UX/UI designer with technical know-how and experience in designing production-grade web applications for both mobile and desktop. You should be comfortable understanding basic financial data, exploring different design options based on various use cases, and building detailed, interactive mockups.

Core Responsibilities:

You will be a part of a cross-functional team, working with client account managers, product managers, and software engineers to tackle complex challenges and build intuitive experiences.

At a minimum, you will be expected to:

- Define user navigation and user interface for new and existing Fi-Tek products and features.
- Develop high fidelity prototypes and/or detailed wireframes to effectively communicate interaction and design ideas.
- Identify and articulate user needs.
- Help to craft Fi-Tek design tenets to ensure design consistency across all products and platforms – including mobile and desktop.

Requirements:

- BA/BS degree in Computer Science, Design, HCI or equivalent practical experience.
- 2+ years of development or prototyping experience.
- Please include a URL with sample portfolios (flows, prototypes, and wireframes). Applications without a URL will not be considered.
- Experience working with production-grade web applications (i.e. more than website design).
- Must demonstrate capability of being self-motivated.
- Effective, cross-functional collaboration between product management and engineering teams.
- Proficiency with design tools such as InVision, Sketch, Adobe XD, or other design software.

Preferred Qualifications:

- MS degree preferred.
- Fluency with HTML, CSS, and JavaScript highly desired.
- Experience with modern JavaScript libraries and frameworks such as Bootstrap and jQuery
- Keep current with latest responsive design techniques.
- Rigorous attention to detail.
- Good at visual design.
- Experience with financial services.

Position Benefits:

- Competitive salary with 401(k) and company match
- Excellent health benefits (Medical/Dental/Vision)
- Flex spending accounts
- Tuition reimbursement
- Gym reimbursement
- Free Uber rides to/from train station
